SUMMARY

**A quality-driven dynamic Front-end Web Developer with over 4 years of experience in developing and managing Digital Marketing content across a wide range of web services.
I work with a diverse group of developers using agile and waterfall methodologies.**

WORK EXPERIENCE

JULY 2017 - PRESENT

VANDERBILT UNIVERSITY

Training and Support Specialist/ Web Developer
- Developed content strategy for key templates in a major design system overhaul.
- A key contributor to quality control feedback for WordPress pattern libraries
- Contributed and received feedback during weekly stand-ups and code reviews
- Contributed to multiple design and development projects, including a million-dollar overhaul and redesign of Vanderbilt's digital experience
- Delivered this project on time and on budget during a global pandemic thanks to the work of our project team, on which I served as a content strategist, quality assurance engineer, and junior developer.
- Manage the University's YouTube channel.
- Completed tasks as varied as updating web page content in WordPress, debugging code, client communications, user training, and quality control of both the back and front-end IT customer experience for the people who use our sites and applications.
- Collaboration with the brand and marketing teams to create digital marketing projects on our websites
